

Bugs reported and fixed for GNU compilers

9. UNROLL.C : parameterise max. number of insns allowed in an unrolled loop

Reported: 18.4.97

By: Stefan Hopper @ Probe

Fixed: SN32.3.7.0002

8. N64.H : N64 build should not output a call to __main if main() defined

Reported: 22.4.97

By: Martin

Fixed: SN32.3.7.0002

7. CCCP.C : should use an output file rather than file redirection for errors

Reported: ?

By: Martin

Fixed: not yet

6. SDBOUT.C : should use 6 dimensions for array debug output, not 4

Reported: ?

By: many!

Fixed: SN32.3.7.0001

5. CCCP.C : #include can't use either a forward or back slash in paths

Reported: ?

By: many!

Fixed: SN32.3.7.0001

4. CCCP.C : #include can't specify a drive letter

Reported: ?

By: many!

Fixed: SN32.3.7.0001

3. MIPS.C : temporary files should be created in the directory TMPDIR

Reported: ?

By: many!

Fixed: SN32.3.7.0001

2. CCCP.C : preprocessor should output makefile rules with object files suffixed with .OBJ rather than .O

Reported: ?

By: Carl Muller

Fixed: SN32.3.7.0001

1. MIPS.C : temporary files not correctly deleted

Reported: ?

By: many!

Fixed: SN32.3.7.0001
